

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) A gaming method, comprising:
- receiving, at a server, a purchase request for at least one wager from a patron at a first client terminal before game play has begun;
- determining, at the server, the results of the at least one wager before game play has begun;
- storing, at the server, the results of the at least one wager in a database before game play has begun;
- adjusting, at the server, an account of the patron based on the results of the at least one wager before game play has begun;
- receiving, from a second client terminal during game play, a request to reveal the results of the at least one wager; and
- sending, from the server, the results of the at least one wager to the ~~first~~ second client terminal during game play ~~before game play has begun, in response to a request received at the server to reveal the results of the at least one wager without game play; and~~
- ~~sending, from the server, the results of the at least one wager to a second client terminal during game play if no request to reveal the results of the at least one wager without game play has been received at the server.~~
